

## THE PPC IS THE FASTEST GROWING POLITICAL MOVEMENT IN CANADA

**At the halfway point in the campaign, support for the PPC is skyrocketing as more Canadians hear our message of freedom and prosperity. Sept 2<sup>nd</sup>, 2021**

According to polls, support for the People's Party of Canada has increased in the past two weeks and some polls have us at 6 or 7% nationally and we are more popular now than the Green Party.

Different firms have different techniques, so before and after comparisons must be done using the same firm, and for example:

**Nanos shows a change from 1.9% on Aug 12<sup>th</sup> to 5% as of Aug 31<sup>st</sup>.**

**This is a growth of 263%.**

Our voice is being heard despite the media pretending we don't exist! CTV News has a map of Canada that shows where party leaders are campaigning every day. They show where the Bloc leader is even though he never leaves Quebec, and where the leader of the imploding

Greens is even though she never leaves her Toronto riding. But not where Bernier is. The CBC Poll Tracker shows the average support in opinion polls for all parties. But not the PPC. We're in the "Other" category. Radio-Canada television interviewed the five other party leaders. But not Max. Last week, Le Journal de Montréal sent us a questionnaire about our policies. They published the answers of the other parties. But not the PPC.

In just a few days will be the Leaders Debate, but the leader of the People's Party will not be on the stage on Sept 8<sup>th</sup> and 9<sup>th</sup>. as the Debate Commission attempts to silence the voice of the People's Party. Despite the snub, we predict support for us will continue to grow and grow.

The word is out – we are a movement that wants to do politics differently and provide a real, principled alternative to the corrupt establishment parties, which rely on pandering and vote-buying schemes to further their interests and those of lobbyists, rather than those of the people. Our common sense policies put Canadians first and we promise that the government will get out of your way rather than trying to control the economy and every aspect of your life. Our government will unite the country in pursuit of common goals instead of dividing it by identity politics.

Without media coverage, we rely on one-on one conversation. Keep spreading the word – talk to your family, friends, and neighbours about our message. Give out this website address and share us on social media.
