

A Attempted Liberal Coup d'Etat

The Trudeau cabinet refuses to implement legislation contemptuously ignoring the will of Parliament in a move never before contemplated in a parliamentary democracy.

June 20th, 2021

A private members bill, Bill C-208, reduces the tax burden paid by farmers who are passing a family farm to an adult child or grandchild. The legislation was passed by the House, with the support of all NDP, Conservative and Bloc members as well as 19 brave Liberals who voted for the measure despite the government opposing it. It was approved by the Senate. It received Royal Assent on June 29. According to federal law, bills go into effect when given royal assent.

On June 30th the Trudeau government stated it will NOT implement the bill, despite the fact it is now the Law of the Land.

Let's be clear. The government executive has denied the will of the People as represented by their Members of Parliament.

This is more than just the arrogance of the elite, more than contempt for the people, more than an illegal act. This a coup d'etat. It is the effective end of our democracy, but the natural progression of a would be king who shuts the House and rules the land from the front door of Rideau Cottage, piling up a trillion dollar debt without a budget, without the approval of the House, showing why he admires China's "basic dictatorship".

UPDATE: As we were preparing this piece, breaking news from Ottawa was that the Finance Department has backpedalled and HAS made the changes to the Income Tax Act. However, they qualified that statement with another that they will bring forward amendments "against any unintended tax avoidance loopholes ... and make sure everyone pays their fair share" according to Minister Freeland. Uh huh! Fair according to who?

So, only an ATTEMPTED coup that lasted 20 days. You can be sure that the Liberals, though stung, will still look for another law to ignore. Perhaps the clause in the Canada Elections Act: "... each general election must be held on the third Monday of October in the fourth calendar year...". That should get rid of this inconvenient democracy thing.

It is time to replace this government with one that is actually built upon and named after the bedrock of democracy: the "People"!
